

Wesley Chapel, FL (April 12, 2012) – As part of his constituent work week, Gus on Monday visited Florida Hospital Wesley Chapel, which is under construction and scheduled to be completed in September.

When complete, the hospital will feature state-of-the-art technology and research opportunities in a three-story, 80-bed center that will eventually expand to six floors and 300 beds.

"This hospital will serve a growing need in the Wesley Chapel area," Gus said. "I look forward to seeing its completion and welcoming the hospital to the community."
